SUMMARY

Bioinformatics undergraduate skilled in Python, sequence analysis, and data-driven systems. I am interested in computational genomics and machine learning applications in biology.

EDUCATION

B.Tech Bioinformatics - SHUATS (2025–2029)

CGPA: 9.52

SKILLS

- **Programming:** Python, C, HTML, CSS
- **Bioinformatics:** BLAST, FASTA, NCBI, PubMed
- **Concepts:** Artificial Intelligence, Machine Learning, OOPs , Data Processing
- **Tools:** Git, GitHub, ReactJS, Supabase

PROJECTS

- **FASTA Sequence Analysis** - Python-based tool for parsing FASTA files and computing GC content & sequence stats
- **NutriTrack** - Database driven nutrition tracking system with structured data workflows
- **FinTrack Dashboard** - Developed a role based financial dashboard with dynamic data handling, filtering, and insights using React, Tailwind CSS, and Zustand.
- **MedVault** - Healthcare record system for secure storage and efficient data retrieval

EXPERIENCE

- **Python Intern, SaiketSystems (Jan-Feb 2026)**
 - Automated data entry tasks using Python, reducing manual effort by ~20%
- **Web Dev Intern, ByteMinder (Sep-Nov 2025)**
 - Developed responsive UI using HTML/CSS

ACTIVITIES / INTERESTS

- **Computational Genomics | Systems Biology | ML in Biology**
- **Participant, Arbitrage Arena (IISc) | Volunteer, ATMoS 2025 | Campus Ambassador, eDC IIT Delhi**
